

GR.EE.N

GRowing participative models for
EnErgy commuNities

GREEN

GR.EE.N - GRowing participative models for EnErgy commuNities is a project funded by the European Union under the Interreg IPA South Adriatic Programme 2021-2027.

Duration

start date - end date

01.02.2024 – 30.01.2025

Main Goal

Energy collective models are a key tool in the fight against climate change and should be driven with a grassroots approach. National, regional and local authorities can support the birth of Energy Communities by providing the right framework, expertise and advice.

Total budget

198.376,34 €

EU funding

160.907,81€

Project Partners

- **Lead Partner** - Union of Municipalities of Grecia Salentina (**Italy**)
- **Partner** - Molise towards 2000 GAL (**Italy**)
- **Partner** - NGO Development Vranj (**Montenegro**)
- **Partner** - European Social Cooperative (**Italy**)
- **Partner** - Environmental and Territorial Management Institute (**Albania**)

Project main activities -Expected output/results

The main activities include 4 living labs in each involved area to create a Joint Model for South Adriatic Energy Communities (JMP). Then, the project will organize a training action for administrators, professionals and insiders to identify tools for Energy Community accelerator. Local Energy Communities are created locally by including citizens, entrepreneurs and administrations for sustainable energy production.
