RESEARCH CHALLENGE

Development of common policies, able to defend and enhance competitiveness and investment capability. Improvement of international competitiveness and systemic cooperation schemes between institutions, businesses, universities, research centers and territorial actors.

RESEARCH OBJECTIVE

Creation of an innovative ecosystem inside the Programme area, interlinked with research, policy makers and entrepreneurial actors, in a public-private logic, able to foster dialogue between the different territories, improve collaborative research actions, support talent mobility and strengthen capacity to attract private capital.

RESEARCH OUTPUT

Definition of an interregional network among the main territorial stakeholders of the “triple helix” and a model of technological center, exportable to Albania and Montenegro.
